Detailed description: This diagram illustrates the correct and incorrect ways to load a car's roof rack. It starts with a warning icon and a hand operating a latch. The main section is divided into several panels: 1) A formula for 'MAX LOADING' showing a roof rack plus luggage, with a callout to the 'CAR MANUAL'. 2) A speed limit panel showing 'MAX 90kg / 198 lb' and speedometers for '130 km/h / 80 mph'. 3) Four panels showing correct ('OK') and incorrect ('NO') loading techniques, including proper tie-downs and avoiding overloading. 4) Two panels for 'DYNAMIC' and 'STATIC' loading, showing that static load can be 2.5x the dynamic load. 5) A final panel showing the formula 'MAX LOAD = CAR MANUAL' and a diagram of a load 'A' plus a load 'B' must be less than or equal to the 'MAX LOAD'.
